PROFILE

Computer Science student with knowledge of C, C++, and Python programming. Currently learning the basics of Artificial Intelligence and Machine Learning. Interested in improving problem-solving skills and gaining practical experience through projects.

SKILLS

- Programming: C++,C, Python
- Database: SQL
- Tools: Crew ai
- Data Visualization
- Communication and teamwork

AWARDS

- Botathon 2nd price
- SIH intracollege Finalist

Certifications

- Joy of Computing with python(NPTEL)
- Ml for beginners(coursera)
- Genai workshop
- Genai for beginner(Infosys Springboard)
- HTML,CSS (Infosys Springboard)
- Introduction to internet of things(NPTEL)

EDUCATION:

B.E. – Computer Science and Engineering
National Engineering College | 2024 – 2028
CGPA: 8.02
Focused on building strong foundations in programming, problem solving, Artificial Intelligence, and Machine Learning.

- Member – CSI (Computer Society of India) Association, National Engineering College
- Participated in inter-college paper presentations, presenting technical ideas and research topics
- Actively learning Artificial Intelligence and Machine Learning fundamentals

PROJECTS

PaySlip Generation

- Developed a console-based application using C++ to generate employee payslips.
- Implemented features to calculate salary details such as basic pay, deductions, and net salary.

Multi-Agent Event Scheduler (CrewAI)

- Built a simple multi-agent system using CrewAI where different agents collaborate to schedule events.
- Implemented roles such as planner, researcher, and checker to coordinate tasks.

AI-Driven Smart Learning Ecosystem (Ongoing Project)

- Designing an AI-based system to improve personalized learning experiences.
- Exploring technologies such as AI/ML models, secure authentication, and role-based access.

Queue Management System for Hospital (Java) – Ongoing

- Developing a Java-based system to manage patient queues efficiently.
- Aims to reduce waiting time and improve hospital workflow.
